

Saved static assignment on physical roads

a Physical-link demand**b Volume / capacity**

4,971 positive physical links of 17,534; max v/c 0.924094. Flow uses square-root colour normalization with real-unit ticks. Virtual turn/access arcs excluded. Each directed physical traversal retains its flow; serial segments are not summed. Model scenario, not traffic counts. © OpenStreetMap contributors / ODbL.
